

TIPS FOR FILMING:

- You can use your phone, tablet or any other video recording device.
- It might be easiest to film your activities/messages in segments that we can edit together later. It doesn't need to be one flawless take.
- Make sure there's plenty of light around you and on your face. Also, you don't want to have a large light source coming from behind you or directly behind your head/body – make sure the light is facing you.
- Do a test clip or two to make sure the audio is clear and everyone can hear what you're saying.
- Don't worry about "messing up." Video is editable for a reason! If you don't nail it on the first try, it's not a problem. As long as your enthusiasm shines through the clip will be awesome.
